A full-page photograph of two skiers. On the left, a man in a green camouflage-patterned ski jacket with yellow accents and a black beanie looks at the camera. On the right, a woman in a dark blue quilted ski jacket with red accents and a grey beanie looks down. Both are holding ski poles. The background is dark and moody.

MENS SOFTGOODS

Armada launched outerwear in 2008 with a few jacket offerings. And The industry took note. Over the following 10 years we learned from their mistakes, and ours, and we listened to skiers. We improved our gear off of their suggestions

then expanded the line—introducing a full lineup of outerwear, a signature Women's Line that doesn't "shrink it and pink it" and an Apparel line for off hill adventures.

MATERIALS

ARMADA X GORE-TEX®

Our mission to build the best performing, most advanced outerwear possible would not be complete without our partnership with GORE-TEX®. Our passion and creativity is now further strengthened by the latest technology and backed by sound science. The results are unique Armada designs offering the highest level of protection and comfort.

GORE-TEX® PRO

To meet the needs of our top athletes, mountain guides and serious backcountry skiers, GORE-TEX® Pro is used to provide tough, extremely breathable, waterproof and windproof protection in the harshest conditions. The GORE-TEX® Pro membrane is the most durable in the GORE-TEX® family and is engineered specifically for the most intense work/rest cycles in backcountry skiing to efficiently regulate temperature and moisture during climbs and descents.

GORE-TEX® FABRICS

Armada garments engineered with GORE-TEX® fabric offer the most reliable waterproof, windproof and breathable performance available, allowing you to keep going longer. Backed by Gore's unique GUARANTEED TO KEEP YOU DRY® promise, Armada's GORE-TEX® garments are designed to last.

GORE® C-KNIT™ BACKER TECHNOLOGY

3-layer GORE-TEX® products with GORE® C-KNIT™ Backer Technology deliver premium performance with a patent-pending construction that increases breathability by 15% and is up to 10% lighter without compromising durability.

OUTERWEAR FABRICS

Outerwear Fabrics start with high-quality face fabrics, custom developed in a variety of weights and weaves that complement each unique design. Our fabrics are laminated to a high-performance waterproof, breathable membrane with a minimum standard of 10K/10K while an additional DWR treatment is applied to the exterior to shed water and snow from the surface.

RDS

Responsible Down Standard: We are proud to say that ALL of the Down Armada uses is RDS down. The Responsible Down Standard safeguards the welfare of geese and ducks. No force-feeding, no live plucking. The Responsible Down Standard ensures that down and feathers come from ducks and geese that have been treated well. This means enabling them to live healthy lives, express innate behaviors, and not suffer from pain, fear or distress. The standard also follows the chain of custody from farm to product, so consumers can be confident that the down and feathers in the products they choose are truly RDS.

TECH

RECCO

RECCO®: This avalanche rescue system is utilized worldwide to facilitate the rapid location of burials. The two parts – reflector and detector – enable rapid pinpointing using harmonic RADAR, but are not a substitute for transceiver use. Complementary in function, the RECCO® system increases the chances of being found in time.

SCHOELLER® KEPROTEC®

Our pant cuffs are reinforced with Schoeller's Keprotec fabric, originally developed for motorcycle racing and using high-tensile fibers, such as Kevlar®, to ensure high durability.

100% SEAM-SEALED STITCHING

Waterproof fabric will not keep you dry by itself. In order to complete the waterproofing of a garment, the seams with stitching must be sealed with a waterproof tape. We are proud to say that all of our seams are 100% seam sealed.

YKK® AQUAGUARD®

WATER REPELLANT ZIPPERS

This is YKK's top of the line Vislon zipper with offset teeth and Polyurethane coating to improve water resistance and seal off our garments from the elements.

YKK® ZIPPERS

Standard throughout the line to provide the highest-quality, most reliable zippers in the industry.

HOOD SYSTEM

The Vector Hood System provides the ability to easily react to changing mountain weather. The system utilizes a 3-way adjustment, accessible from inside and outside the jacket, and a quick release pull to instantly loosen the hood. All excess bungee stores out of your way, inside the jacket.

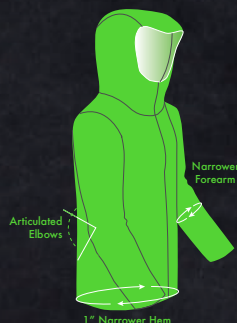

HELMET-COMPATIBLE HOOD

All of our hoods are designed to be fully functional while wearing a helmet.

JACKET-TO-PANT SNAP INTERFACE

Standard on all our outerwear, our jacket-to-pant snap interface provides a simple and ergonomic connection between your jacket's powder skirt and your pant.

FIT

Tech

An articulated cut to improve mobility when skiing and hiking. Slightly narrower at the hem and forearm.

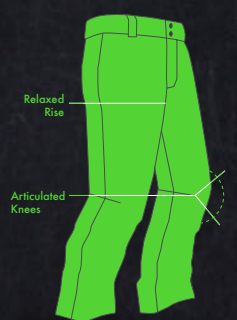

Moderate Tailored

Moderate in width and length, this fit has light tailoring for a trimmer silhouette and an additional 1-2" in length.

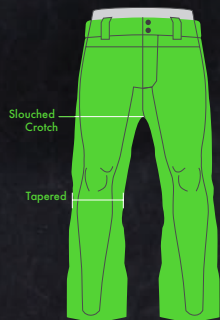

Moderate Tailored Long

Same as our Moderate Tailored fit with an additional 2-3" in length

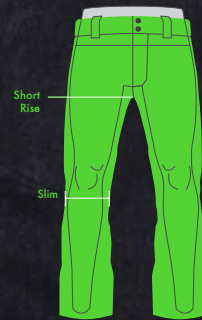

Tech

A more articulated cut to improve mobility when high stepping, touring and skiing.

Moderate Tailored

Moderate tailoring that tapers to an articulated knee to optimize mobility in a fashion forward cut.

Slim

Slim through the legs and hips with a relaxed waist.

FEATURES

Pit Vents

Adjustable Powder Skirt

Recco

Reactive hood with Reinforced Brim and Cohesive

Wrist Gaitor

MENS OUTERWEAR

Mother Nature does not give a damn that you wanted a powder day. Thankfully Armada makes **OUTERWEAR** for any and all conditions the wicked witch of weather hands out. From thoughtfully

designed three-layer GORE-TEX pants and jackets to comfortable and warm mid- and baselayers, we've got you covered for any and all kinds of ski days.

A man is shown from the waist up, wearing a dark grey knit beanie, a black balaclava covering his mouth and nose, and a black quilted puffer jacket. Underneath the jacket, a blue and white camouflage t-shirt is visible. The background is dark and textured, possibly snow or a dark wall. The entire image is framed by a thin white border.

MENS LAYERING

It's been said a man is only as good as his layers. At least that is what our sales reps tell us. We make Armada **LAYERING**

with the specific needs of skiers in mind. You're welcome, skiers. And sales reps.

A full-page photograph of two women in winter sports attire. The woman on the left is wearing a grey knit beanie, large ski goggles with 'SPY' on the strap, and a maroon jacket. The woman on the right is wearing a green hooded jacket with a large fur trim and maroon pants. They are standing in a snowy environment.

WOMENS SOFTGOODS

This ain't no intro. This is the entree. The 2018-2019 Armada **WOMEN'S SOFTGOODS** Lineup is back with a murderer's row of technical, dry, warm,

and comfortable on and off-the-hill clothing that doesn't sacrifice fashion for practicality or vice a versa.

MATERIALS

ARMADA X GORE-TEX®

Our mission to build the best performing, most advanced outerwear possible would not be complete without our partnership with GORE-TEX®. Our passion and creativity is now further strengthened by the latest technology and backed by sound science. The results are unique Armada designs offering the highest level of protection and comfort.

GORE-TEX® PRO

To meet the needs of our top athletes, mountain guides and serious backcountry skiers, GORE-TEX® Pro is used to provide tough, extremely breathable, waterproof and windproof protection in the harshest conditions. The GORE-TEX® Pro membrane is the most durable in the GORE-TEX® family and is engineered specifically for the most intense work/rest cycles in backcountry skiing to efficiently regulate temperature and moisture during climbs and descents.

GORE-TEX® FABRICS

Armada garments engineered with GORE-TEX® fabric offer the most reliable waterproof, windproof and breathable performance available, allowing you to keep going longer. Backed by Gore's unique GUARANTEED TO KEEP YOU DRY® promise, Armada's GORE-TEX® garments are designed to last.

GORE® C-KNIT™ BACKER TECHNOLOGY

3-layer GORE-TEX® products with GORE® C-KNIT™ Backer Technology deliver premium performance with a patent-pending construction that increases breathability by 15% and is up to 10% lighter without compromising durability.

OUTERWEAR FABRICS

Outerwear Fabrics start with high-quality face fabrics, custom developed in a variety of weights and weaves that complement each unique design. Our fabrics are laminated to a high-performance waterproof, breathable membrane with a minimum standard of 10K/10K while an additional DWR treatment is applied to the exterior to shed water and snow from the surface.

RDS

Responsible Down Standard: We are proud to say that ALL of the Down Armada uses is RDS down. The Responsible Down Standard safeguards the welfare of geese and ducks. No force-feeding, no live plucking. The Responsible Down Standard ensures that down and feathers come from ducks and geese that have been treated well. This means enabling them to live healthy lives, express innate behaviors, and not suffer from pain, fear or distress. The standard also follows the chain of custody from farm to product, so consumers can be confident that the down and feathers in the products they choose are truly RDS.

TECH

RECCO

RECCO®: This avalanche rescue system is utilized worldwide to facilitate the rapid location of burials. The two parts – reflector and detector – enable rapid pinpointing using harmonic RADAR, but are not a substitute for transceiver use. Complementary in function, the RECCO® system increases the chances of being found in time.

SCHOELLER® KEPROTEC®

Our pant cuffs are reinforced with Schoeller's Keprotec fabric, originally developed for motorcycle racing and using high-tensile fibers, such as Kevlar®, to ensure high durability.

100% SEAM-SEALED STITCHING

Waterproof fabric will not keep you dry by itself. In order to complete the waterproofing of a garment, the seams with stitching must be sealed with a waterproof tape. We are proud to say that all of our seams are 100% seam sealed.

YKK® AQUAGUARD®

WATER REPELLANT ZIPPERS

This is YKK's top of the line Vislon zipper with offset teeth and Polyurethane coating to improve water resistance and seal off our garments from the elements.

YKK® ZIPPERS

Standard throughout the line to provide the highest-quality, most reliable zippers in the industry.

HOOD SYSTEM

The Vector Hood System provides the ability to easily react to changing mountain weather. The system utilizes a 3-way adjustment, accessible from inside and outside the jacket, and a quick release pull to instantly loosen the hood. All excess bungee stores out of your way, inside the jacket.

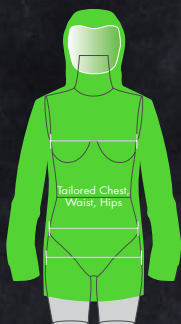

HELMET-COMPATIBLE HOOD

All of our hoods are designed to be fully functional while wearing a helmet.

JACKET-TO-PANT SNAP INTERFACE

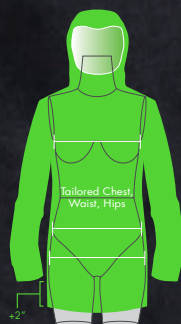

Standard on all our outerwear, our jacket-to-pant snap interface provides a simple and ergonomic connection between your jacket's powder skirt and your pant.

FIT

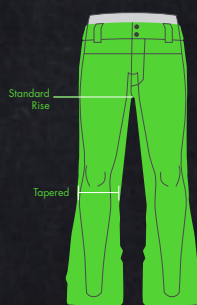

Moderate Tailored

A tailored fit coupled with extra length for a long, slim silhouette

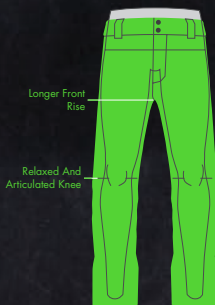

Moderate Tailored Long

An extra long body with a flattering shape, that provides more protection and more style.

Traditional

The most versatile fit for a flattering look, comfort, and mobility. Has subtle shaping through the leg.

Tech

Articulated and relaxed through the knee with a slightly longer front rise for ease of movement.

Slim

A more tailored fit through the hips and thigh with a tapered knee and flared hem.

FEATURES

Jacket to Pant Interface

Adjustable Powder Skirt

Recco

Reactive hood with Reinforced Brim

Boot Gaitor

WOMENS OUTERWEAR

Let's get it. The time is now for one more turn, one more round, one more...anything. The Armada **WOMEN'S OUTERWEAR**

line is built for ladies who set their own pace and march to the beat of their own drums.
