WELCOME TO
SOFTGOODS

We have two main goals that drive our Softgoods program. To build the best product possible which caters to the performance needs of our athletes and consumers worldwide. Also offering them an alternative to available industry standards in terms of fit and design. As you will see on the following

pages, we won't be everything to everyone. We live, learn, and evolve while staying true to our original vision.

We take pride in what we do and we hope to make a small impact in the way you experience the mountains. Enjoy.

MENS

OUTERWEAR

Akin to when we started making skis, our Outerwear program was created out of a need. The need of our athletes and skiers around the world for technical gear that performs to their expectations while letting them express themselves and their idea of what skiing could be, if not confined by an aging industry. Today, 11 years later, our approach remains the same.

Targeting a more technical, performance-oriented freeride skier as well as a younger, style-driven freestyle consumer, we offer two distinct collections with different emphasis; both shaped and connected by the same vision of what modern ski outerwear should look like.

MATERIALS

ARMADA X GORE-TEX®

Our mission to build the best performing, most advanced outerwear possible would not be complete without our partnership with GORE-TEX®. Our passion and creativity is now further strengthened by the latest technology and backed by sound science. The results are unique Armada designs offering the highest level of protection and comfort.

GORE-TEX® PRO

To meet the needs of our top athletes, mountain guides and serious backcountry skiers, GORE-TEX® Pro is used to provide tough, extremely breathable, waterproof and windproof protection in the harshest conditions. The GORE-TEX® Pro membrane is the most durable in the GORE-TEX® family and is engineered specifically for the most intense work/rest cycles in backcountry skiing to efficiently regulate temperature and moisture during climbs and descents.

GORE-TEX® FABRICS

Armada garments engineered with GORE-TEX® fabric offer the most reliable waterproof, windproof and breathable performance available, allowing you to keep going longer. Backed by Gore's unique GUARANTEED TO KEEP YOU DRY® promise, Armada's GORE-TEX® garments are designed to last.

GORE® C-KNIT™ BACKER TECHNOLOGY

3-layer GORE-TEX® products with GORE® C-KNIT™ Backer Technology deliver premium performance with a patent-pending construction that increases breathability by 15% and is up to 10% lighter without compromising durability.

OUTERWEAR FABRICS

Outerwear Fabrics start with high-quality face fabrics, custom developed in a variety of weights and weaves that complement each unique design. Our fabrics are laminated to a high-performance waterproof, breathable membrane with a minimum standard of 10K/10K while an additional DWR treatment is applied to the exterior to shed water and snow from the surface.

RDS

Responsible Down Standard: We are proud to say that ALL of the Down Armada uses is RDS down. The Responsible Down Standard safeguards the welfare of geese and ducks. No force-feeding, no live plucking. The Responsible Down Standard ensures that down and feathers come from ducks and geese that have been treated well. This means enabling them to live healthy lives, express innate behaviors, and not suffer from pain, fear or distress. The standard also follows the chain of custody from farm to product, so consumers can be confident that the down and feathers in the products they choose are truly RDS.

TECHNOLOGY

RECCO

RECCO®: This avalanche rescue system is utilized worldwide to facilitate the rapid location of burials. The two parts – reflector and detector – enable rapid pinpointing using harmonic RADAR, but are not a substitute for transceiver use. Complementary in function, the RECCO® system increases the chances of being found in time.

SCHOELLER® KEPROTEC®

Our pant cuffs are reinforced with Schoeller's Keprotec fabric, originally developed for motorcycle racing and using high-tensile fibers, such as Kevlar®, to ensure high durability.

100% SEAM-SEALED STITCHING

Waterproof fabric will not keep you dry by itself. In order to complete the waterproofing of a garment, the seams with stitching must be sealed with a waterproof tape. We are proud to say that all of our seams are 100% seam sealed.

YKK® AQUAGUARD®

WATER REPELLANT ZIPPERS

This is YKK's top of the line Vislon zipper with offset teeth and Polyurethane coating to improve water resistance and seal off our garments from the elements.

YKK® ZIPPERS

Standard throughout the line to provide the highest-quality, most reliable zippers in the industry.

HOOD SYSTEM

The Vector Hood System provides the ability to easily react to changing mountain weather. The system utilizes a 3-way adjustment, accessible from inside and outside the jacket, and a quick release pull to instantly loosen the hood. All excess bungee stores out of your way, inside the jacket.

HELMET-COMPATIBLE HOOD

All of our hoods are designed to be fully functional while wearing a helmet.

JACKET-TO-PANT SNAP INTERFACE

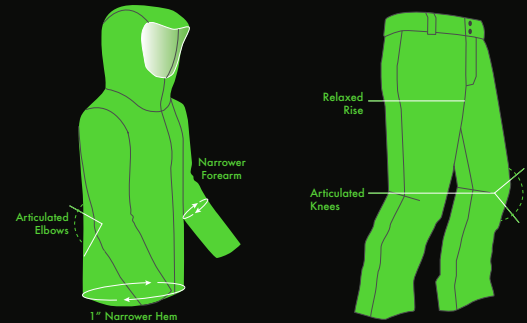

Standard on all our outerwear, our jacket-to-pant snap interface provides a simple and ergonomic connection between your jacket's powder skirt and your pant.

FITS

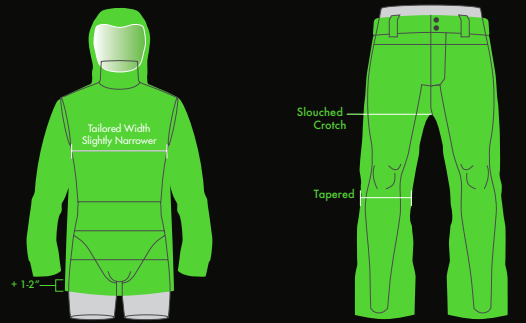

TECH

MODERATE TAILORED

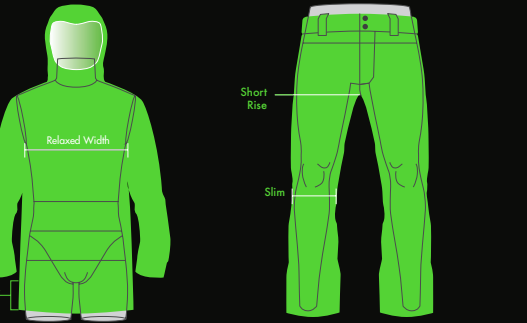

MODERATE TAILORED LONG / SLIM

An articulated cut to improve mobility when skiing and hiking. Slightly narrower at the hem and forearm.

A more articulated cut to improve mobility when high stepping, touring and skiing.

Moderate in width and length, this fit has light tailoring for a trimmer silhouette and an additional 1-2" in length.

Moderate tailoring that tapers to an articulated knee to optimize mobility in a fashion forward cut.

We've grown a lot in the past 17 years, and we've matured along the way. ARfamily has evolved into a diverse group of people and our Freeride Outerwear reflects that. Drawing inspiration from Ian Provo and his DIY missions in Alaska, Tanner chasing unnamed pillow zones around the world and Tof Henry's Big Mountain ambitions in Chamonix; the freeride collection focuses on finding a balance between functional, high-end performance and designs in line with Armada's athlete-driven and creative heritage. Offering a strong point of view and an alternative to prevalent industry standards.

BALFOUR GORE-TEX® PRO 3L JACKET

R00001\$

FABRIC: 100% Nylon Face, 100% Nylon Back
TECHNOLOGY: GORE-TEX® PRO 3L New Generation w/ Microgrid Backer
FIT: Tech

本体価格 ¥ 78,000 -

Mountain-professional approved, fully featured GORE-TEX® PRO 3L. The Balfour GORE-TEX PRO 3L Jacket is built to the highest standards of our athletes, heli-guides, and mountain professionals. GORE-TEX® PRO 3L is the most durable, waterproof, windproof, and breathable snow

sports material on the market, built into a shell jacket with all the features you need when working or seriously adventuring in the backcountry. The Tech Fit wraps your body perfectly, while specifically placed vents help regulate your body temperature. The Balfour GORE-TEX PRO 3L Jacket is our state-of-heart Gore Shell.

FOREST GREEN MARBLE

BASIN GORE-TEX® PRO 3L PANT

R00032\$

FABRIC: 100% Nylon Face, 100% Nylon Back
TECHNOLOGY: GORE-TEX® PRO 3L New Generation w/ Microgrid Backer
FIT: Tech

本体価格 ¥ 70,000 -

Mountain-professional approved, fully featured GORE-TEX® PRO 3L Pant. Complementing the Balfour Jacket, the Basin GORE-TEX PRO 3L Pant completes a kit specifically designed for athletes, guides and mountain professionals. GORE-TEX®

PRO 3L is the most durable, waterproof, windproof, and breathable snow sports material on the market. 100% Seam Sealing, a 4-Way Stretch Bib and cross flow ventilation make it your ultimate companion for any serious winter adventure.

BLACK

"I probably wore it 50 days straight at one point. It stands up to sledding, resort riding, and long backcountry days. The ventilation is plentiful for touring and the kick patch is large and hearty and will stand up to crampons well." — Todd Ligare.

Freestyle is our heritage and our core. We will always stay committed to this part of skiing, because it is who we are. Our Freestyle Outerwear collection is inspired by Kim Boberg and Mike Hornbeck, two of the most passionate and hardest working skiers we've ever come across. It's inspired by TYW, the rest of the ARfamily and their creativity every time they put on a pair of skis. We are emboldened by every dedicated park kid out there that believes in freedom of expression through individual style and contributes to the culture on a daily basis.

AR Freestyle Outerwear. Youthful, fashion-forward and clean. With a == influence.

MENS

LAYERING

A gear kit is only as strong as it's weakest piece. We designed the 19/20 Layering Collection with that mentality in mind as each product is built to stand alone or do its part in the collective. From technical base and mid layers to hybrid polyester stretch and insulation, the foundation has been set.

NEW GREMLIN JACKET R00318\$

FABRIC: 100% Polyester
INSULATION: 60g Primaloft® Gold Eco
FIT: Moderate Tailored
本体価格 ¥ 25,000 -

The most important Layering Piece you will ever own. Warm > Cold. The one layer that almost every single member of ARfamily rocks in any condition. With 60g Primaloft® Gold Eco Insulation the Gremlin Jacket will keep you warm and dry from the backcountry of Retallack to the cold days you find your- self stuck on the lift. Super versatile and made to be worn under a shell on a storm day, or alone when its bluebird. The Gremlin Jacket keeps you warm and looking good in any condition.

WOMENS
SOFTGOODS

We are here to weather the storm, both figuratively and literally, and our Outerwear is built to match. The 19/20 Women's Outerwear Collection features everything from technical, high performance gear to freestyle kits, and progressive all-mtn pieces. Updates to favorites, reliable staples, and first year intros showcase Armadas distinct design and style while maintaining practicality.

MATERIALS

ARMADA X GORE-TEX®

Our mission to build the best performing, most advanced outerwear possible would not be complete without our partnership with GORE-TEX®. Our passion and creativity is now further strengthened by the latest technology and backed by sound science. The results are unique Armada designs offering the highest level of protection and comfort.

GORE-TEX® PRO

To meet the needs of our top athletes, mountain guides and serious backcountry skiers, GORE-TEX® Pro is used to provide tough, extremely breathable, waterproof and windproof protection in the harshest conditions. The GORE-TEX® Pro membrane is the most durable in the GORE-TEX® family and is engineered specifically for the most intense work/rest cycles in backcountry skiing to efficiently regulate temperature and moisture during climbs and descents.

GORE-TEX® FABRICS

Armada garments engineered with GORE-TEX® fabric offer the most reliable waterproof, wind-proof and breathable performance available, allowing you to keep going longer. Backed by Gore's unique GUARANTEED TO KEEP YOU DRY® promise, Armada's GORE-TEX® garments are designed to last.

GORE® C-KNIT™ BACKER TECHNOLOGY

3-layer GORE-TEX® products with GORE® C-KNIT™ Backer Technology deliver premium performance with a patent-pending construction that increases breathability by 15% and is up to 10% lighter without compromising durability.

OUTERWEAR FABRICS

Outerwear Fabrics start with high-quality face fabrics, custom developed in a variety of weights and weaves that complement each unique design. Our fabrics are laminated to a high-performance waterproof, breathable membrane with a minimum standard of 10K/10K while an additional DWR treatment is applied to the exterior to shed water and snow from the surface.

RDS

Responsible Down Standard: We are proud to say that ALL of the Down Armada uses is RDS down. The Responsible Down Standard safeguards the welfare of geese and ducks. No force-feeding, no live plucking. The Responsible Down Standard ensures that down and feathers come from ducks and geese that have been treated well. This means enabling them to live healthy lives, express innate behaviors, and not suffer from pain, fear or distress. The standard also follows the chain of custody from farm to product, so consumers can be confident that the down and feathers in the products they choose are truly RDS.

TECHNOLOGY

RECCO

RECCO®: This avalanche rescue system is utilized worldwide to facilitate the rapid location of burials. The two parts – reflector and detector – enable rapid pinpointing using harmonic RADAR, but are not a substitute for transceiver use. Complementary in function, the RECCO® system increases the chances of being found in time.

SCHOELLER® KEPROTEC®

Our pant cuffs are reinforced with Schoeller's Keprotec fabric, originally developed for motorcycle racing and using high-tensile fibers, such as Kevlar®, to ensure high durability.

100% SEAM-SEALED STITCHING

Waterproof fabric will not keep you dry by itself. In order to complete the waterproofing of a garment, the seams with stitching must be sealed with a waterproof tape. We are proud to say that all of our seams are 100% seam sealed.

YKK® AQUAGUARD®

WATER REPELLANT ZIPPERS

This is YKK's top of the line Vislon zipper with offset teeth and Polyurethane coating to improve water resistance and seal off our garments from the elements.

YKK® ZIPPERS

Standard throughout the line to provide the highest-quality, most reliable zippers in the industry.

HOOD SYSTEM

The Vector Hood System provides the ability to easily react to changing mountain weather. The system utilizes a 3-way adjustment, accessible from inside and outside the jacket, and a quick release pull to instantly loosen the hood. All excess bungee stores out of your way, inside the jacket.

HELMET-COMPATIBLE HOOD

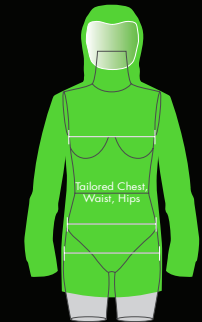

All of our hoods are designed to be fully functional while wearing a helmet.

JACKET-TO-PANT SNAP INTERFACE

Standard on all our outerwear, our jacket-to-pant snap interface provides a simple and ergonomic connection between your jacket's powder skirt and your pant.

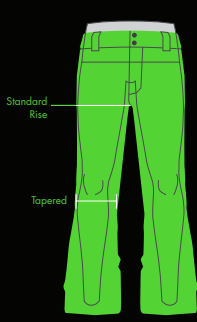

FITS

MODERATE TAILORED / LONG

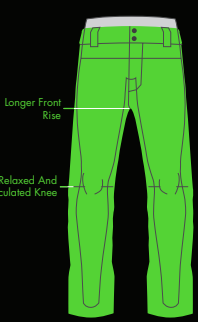

A tailored fit coupled with extra length for a long, slim silhouette

TRADITIONAL

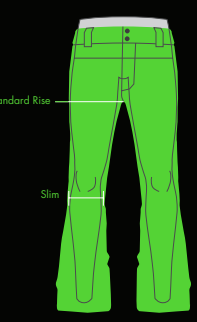

The most versatile fit for a flattering look, comfort, and mobility. Has subtle shaping through the leg.

Street inspired All Mtn. Bib

Another team favorite, the Cassie, is back with updated Adjustable Straps that stretch and move for unrestricted mobility. The Slim Fit Overall showcases the feminine form and your unique sense of style. 10K Waterproofing and Breathability combined with Mesh Lining with Brushed Tricot Seat will keep you warm and comfortable. And the Boot Gaiters, Lower Boot Gussets, and Schoeller® Keprotec® Cuff Reinforcement ensure you don't have to sacrifice function for style.

WOMENS

LAYERING

A gear kit is only as strong as it's weakest piece. We designed the 19/20 Layering Collection with that mentality in mind as each product is built to stand alone or do its part in the collective. From technical base and mid layers to hybrid polyester stretch and insulation, the foundation has been set.

80g Polyfill

FIT:

Moderate Tailored

本体価格 ¥ 18,000 -

Insulated Pullover for everyday use

New for 19/20 is the Mesa Pullover. The “better half” to our Bryce Insulated Shirt. We took what we loved about the Bryce, gave it a feminine design and cut and made it a pull-over for good measure. Moderate Tailored Fit with 80g Polyfill

Insulation can be worn alone as a day to day piece or layered under a shell on a storm day. On and off is a breeze with Side Seam Easy Access, Stretch cuffs and Snap CF Placket. The Mesa is our new office favorite for everyday use.
